Native wheat & corn starches (原生小麦和玉米淀粉)

Native starches are used as a food additive for baking, instant food products, dairy products, confectionery, meat and fish products, and other cooking.

For consumers who keep the gluten-free diet, we offer one of the basic ingredients — the gluten-free starch, which is produced by the enzymatic method of processing native wheat starch.

Modified wheat & corn starches (改性小麦和玉米淀粉)

Interstarch offers a wide range of modified starches. Each type of starch has undergone technological testing in R&D laboratories, as well as in real production conditions and adapted to a wide range of applications in the food industry.

The range of modified starches as a whole increases the consumer qualities of the finished product and stability over the shelf life. We offer dried and pregelatinized starch or cold swelling starch for the non-heating usage.

Vital wheat gluten (重要小麦面筋)

Interstarch Ukraine offers wheat gluten obtained from high-quality wheat, grown in the fields of Vinnytsia region of Ukraine. Due to the delicate removal and proper drying of raw materials, our wheat gluten stands out with its original natural characteristics.

Glucose syrups (葡萄糖浆)

Glucose-fructose syrups (葡萄糖 - 果糖糖浆)

High maltose syrups (高麦芽糖浆)

Dried syrups (干糖浆)

Maltodextrins (麦芽糊精)

Crystalline fructose (结晶果糖)

Gluten-free baking ingredients (无麸质烘焙原料)

Interstarch Ukraine appreciates the interests and needs of customers. We believe that a sharp outbreak of gluten-related disorders should not remain without reaction, which is why we developed a series of gluten-free starches and baking mixes.

Our gluten-free starches and baking mixes comply with the laws of the gluten content in products labeled as gluten-free contain less than 20 mg/kg of gluten.

Ready to offer solutions,
happy to exceed expectations!
